Precast Hog™

Control and flow control.

"Anyone knows when you open up a pouring bucket you can't always get it closed. That's no problem with the Precast Hog. Controlling the flow of concrete is one of the Precast Hog's best features. I would recommend this product to anyone and HAVE recommended it to other precasters. I'm planning on purchasing another one!"
Kirby O' Malley - Garden State Precast

Hydraulic Powered

The Mud Hog® is now available in Gas Powered or Electric Powered!

The Mud Hog® Mixing Station

The **Mud Hog®** hydraulic mixing station is the industry's only adjustable height mixer. Forklift pockets are available from any side.

The station raises to dump directly into a **Precast Hog™** or Mud Pan. This innovation is built for years of use, easy maintenance, and definitely worth a second look!

- Perfect for smaller or colored batches
- 20 cu. ft. capacity
- Portable - Equipped with fork pockets
- Adjustable height
- Load/Fill height - 36 to 54 inches
- Dump range - 37 to 55 inches
- Hydraulic drive and hydraulic dump
